

SUSTAINABLE PURCHASING POLICY

As Kuzuflex Metal San Tic A.Ş.;

We believe in the importance of interacting with suppliers who work effectively to reduce the negative environmental or social impacts of operations.

Our principle applies to all Kuzuflex Metal San Tic A.Ş. and all legal entities in Turkey and abroad. It covers all employees, managers, contractors and business partners regardless of religion, language, race, gender, marital status, physical disability, region, etc.

We are committed to purchasing raw materials from suppliers who can prove that they are compliant with environmental and social best practices. Within the scope of the assessment, we work with a method based on suppliers with ISO 14001 and ISO 45001 certificates receiving higher scores. We are committed to creating a more sustainable supply chain by setting a series of relevant and effective targets.

By 2030, we aim to ensure that 25% of suppliers sign our Supplier Handbook, General and Privacy Agreements every year. We also aim to assess 100% of our strategic suppliers to provide fair wages to their employees by 2026.

A special sustainability team has been established by the management. The environmental consultant and the team leader will oversee the implementation of this principle.

These principles are regularly updated by the sustainability team and all changes made are communicated to the relevant parties. For all your questions and complaints, you can contact us at info@kuzuflex.com.
