14001:2015 ENVIRONMENTAL POLICY

As Kuzuflex Metal San Tic A.Ş.;

*We manage our work with a sensitive awareness that exceeds legal obligations in environmental issues.
We accept the reduction of environmental impacts, the protection of energy and natural resources as our priority in our process designs
and all our activities and as one of our most important duties for a sustainable world.*

*We undertake to use our energy and natural resources at a minimum level, to fulfill compliance obligations and legal activities
regarding our environmental dimensions, to prevent our waste and eliminate it with remedial activities,*

To increase environmental performance; continuous improvement,

*We undertake to protect the environment with these systems that we have established and ensured their continuity,
We undertake to carry out our business in a responsible and sustainable manner by working to improve performance in issues such as
energy consumption and our natural resources and greenhouse gas emissions, water consumption and discharge, air pollution and
waste management and product life cycles, taking into account the full impact on the environment.*

*Our principles are valid for all legal institutions in Turkey and abroad. It covers all employees, managers, contractors and business
partners.*

*We monitor and commit to achieving our goals of reducing gross scope 1 and 2 greenhouse gas emissions, monitoring water
consumption at all production sites and investing in processes that will enable more efficient water recycling,
recycling materials wherever applicable, including all production areas and offices,
considering the entire product life cycle at all design stages to minimize energy consumption and waste.*

Our goals are to reduce energy consumption by 10% in all production locations by 2026 (based on the 2023 reference year),

*Achieve carbon neutrality by 2030,
Ensure recycling activities in all office areas by 2026.*

*A dedicated sustainability team has been established by the management. The environmental consultant and the team leader will
oversee the implementation of this principle.*

*These principles are regularly updated by the sustainability team and all changes made are communicated to the relevant parties.
